# THE STOCK MARKET.

The stock market bobbed around a little fast week but there was not much change from the preceding week 5 to 42.50; 7 to 42.375, Prices still show a tendency to ease off and it looks as though the high mark had been reached. There is not reason to look forward to any material sump but on the other hand any very ice ded advance seems to be unlikely,

Extravagant forecasts regarding the probable crop productions of the larger plantations made earlier in the season probably had more or less to do with ie auxiety of small buyers to get in. anditions this year have been excentionally favorable to sugar, and crops will be cleared out of the way consil erably earlier than they were fast year. But though some plantations may over run their estimates a little, it is not probable that there will be any decidof departures from the estimates issued early in the season.

As was to be expected the extravagant stories of greatly increased outparts on the plantations have been folwed by equally baseless stories of hortages. Some of these may have affected the stock market a little, but with experts, the most reasonable solution of the n the suggestion that shares reached port with the following: ower and then stopped.

Ewa has been slipping back a little con on the surface for this retrogresmye made a thorough examination of to understand that at present, horitative statement to the effect that think, a very good gamble, is effectually disposed of, alt was to this week, be supposed that an advance in the publication of the directors' report. ## HUMAUMA OIL.

J. A. Kennedy has received a letter from Derwent Kennedy making a most favorable report on the lands in the Elkhorn Valley of San Lais Obispocounty, California, on which the Humauma Oil Company holds an option, Kennedy, at the request of his father, paid a visit to the property and made a thorough examination in company

After reviewing the situation thoroughly Derwent Kennedy closes his re-

"I think I have given you an outline price commensurate with the earning of the district, the way it impressed me and what the others think of it and what the Associated is doing. From from the high figure arrived at some all sources I have had the same answer weeks ago. There is no particular real and that is that it is an oil country, and one in which oil of high gravity ave mavement. The directors of Ewa will be found. Of course, you will have he plantation and have issued an aut nothing more than a gamble, but, I

tories of shortage in crop are base. Frank M. Payne, who is handling the ess. The statement of the directors work of organization for the new comcan be taken as final so that bugaboo pany, will leave for Hilo on business
